The Nugget Is California's Leading Mining Weekly

Nevada City Nugget

VOLUME V, NUMBER 42 THE GOLD CENTER. THE NEVADA CITY NUGGET, CALIFORNIA THE COUNTY SEAT PAPER FRIDAY, OCT. 30, 1931.

SIXTEEN TO ONE HISTORY GIVEN

(Continued From Last Week)

Measured on the dip, the distance covered by the workings is a little over 3,000 feet from the apex under the lava capping. The length served the drifts approximates 2,500 feet. Comparatively little cross cutting was done, although the Tightner adit is a crosscut. On the 2,100 level, as a result of a fault, a 200-foot crosscut in the footwall of the winze was necessary to cut the vein. Thus the mine development workings are almost restricted to the plane of the Sixteen-to-One vein. The 800 level of the Tightner connects with a drainage adit.

The area of vein exposed by the development work is about 7,500,000 square feet. Below the Johnson upper tunnel and above the Tightner adit is a fault that intersects the vicinity of the 250 and 300 levels of the Sixteen-to-One. Its displacement varies from 30 feet to an estimated maximum of 100 feet. The Tightner faults are steep, dipping 70 degrees to the west. Between the 250 and 1,800 levels only minor faults occur, parallel to the Tightner fault and with displacements from a few inches to as much as 15 feet. The lower main shaft fault intersects the vein at the 1,800 level. Its displacement is about 180 feet, the eastern segment of the vein being displaced downward. The strike of the fault is apparently a little more northerly than the upper fault, although both fault planes appear to approach toward the south. In the lower main fault the strike is north 20 degrees west. The strike of the vein is north 15 degrees west, but varies considerably. The vein dips to the east.

When the Tightner winze struck the fault plane in the vicinity of the 1,900 level, and the vein disappeared, the winze was continued. The present superintendent asked Maxfield how far sinking was to be continued before crosscutting. Maxfield said: "How long is the rope?" The superintendent replied, "Twenty-one hundred feet." Maxfield then said:

(Continued on page two)

NEVADA COUNTY FARMERS ELECT OFFICERS FOR YEAR

W. E. Parsons, rancher of the Banner district, was reelected president of the Nevada County Farm Bureau at the annual meeting of the bureau held at Peardale last Saturday.

E. O. Gassoway was elected vice president; C. J. Rolph, representative to the State Farm Bureau Federation, and William Ullrich, representative on the board of regents of the promotion board.

W. E. Blackburn, state federation president, was the principal speaker at the annual meeting. He gave an hour's address devoted to farm economics, Muscle Shoals and kindred topics. Blackburn referred to the frequent presidential vetoes of Muscle Shoals legislation and stated that the National Farm Bureau Federation had been asked by President Hoover to submit a plan whereby the shoals might be operated in the manufacture of fertilizer. Such plan will probably appear before the incoming congress, it was indicated.

GRASS VALLEY TO HOLD MINE ASSOCIATION MEET

The Nevada County Chapter of the Mining Association of California will hold a meeting in Grass Valley October 31st. A dinner at Bret Harte Inn at 6:30 will precede the meeting.

An interesting and important program is being prepared. It is thought visitors will be present from Placerville, Sacramento, Auburn, Oroville. With a good attendance from local members there should be a large crowd present.

Arthur B. Foote is chairman of the local organization and Errol MacBoyle is president of the State Association.

Mr. and Mrs. Milton Kieffer of Sacramento spent the week end with her parents, Mr. and Mrs. S. S. Trevethick.

NUGGET READER COMMENT ON PLATINUM ARTICLE

By T. . Marshall

To Editor, Nevada City, Nugget.

As part owner in an old hydraulic property I was muchinterested in the item in your issue of October 16th, concerning the presence of platinum in the auriferous gravels of California, and if you will grant us space I would like to make a few comments on it.

I think there is no reliable data on the quantity of that metal in the auriferous gravels. Of course it varies in different localities and different properties in the same neighborhood; but in my opinion unless the ratio of platinum to gold, in the values recovered, is rather high I doubt if it would be profitable, at the present price of platinum, to separate these after they are alloyed in one bar of bullion. So that if the miner is to receive any extra benefit from the platinum in his gravel it will have to be separated in some wya before it is alloyed with the gold in the bullion. I suppose this is possible though I have never known it to be done. Perhaps some of your readers better informed on this matter coul denlighten us.

For many years I wondered why there was no mention of any platinum recovered fromthe old hydraulic mines before 1883, and only within the last few years a possible explanation of this ha soccurred to me. In the eighteen, seventies, when

(Continued on Page Five)

SEASONAL RAINFALL IS MUCH HEAVIER TO DATE

The last two rains have brought the seasonal rainfall to 5:33 inches. A total of 2.42 inches fell in the last two storms.

The heavy rain of last Sunday prevented several sports events being carried out, and a number of fishermen missed the pleasure of a good day's fishing.

Rain fell in the lower mountains but higher up snow and hail fell.

The total rainfall of 5.33 inches is almost two inches more than the 1930-31 season's total, which was 3.33 to this date, or 3.91 inches more than for the corresponding date last year.

EDITOR TAKES VACATION TRIP

Mrs. Elsie P. Willoughby is enjoying a short vacation. She attended to business matters the early part of the week in San Francisco, and from there she went to Mendocino City where she spent some time visiting relatives. She will attend the meeting of Northern California Chapter Mining Association of California at Weaverville which will be held Saturday evening, October 31st.

Grass Valley to Celebrate Gold Quartz Discovery

Grass Valley has made extensive plans for the two day Gold Quartz Discovery Day celebration. Chairman Eben Smart stated that the celebration is assuming larger importance than anticipated and promises to be largely attended by outside groups as well as local people.

Saturday will be devoted to sports and various forms of entertainment, including a cross country race with distant runners from various places of Superior California entered. A huge Hallowe'en parade in the evening by juvenile and youth groups will be an attractive feature. Prizes will be offered for most striking costumes.

Sunday Discovery Day ceremonies will be held at the Gold Hill site already marked by a large granite shaft. At 1:30 Sunday afternoon formal exercises will be held at the Gold Hill Marker. Judge George L. Jones will act as master of ceremonies and deliver the opening address of welcome after which there will be a fine program.

At 3 o'clock the Grass Valley Atheletic Club-Oakland Acorn football game is to be held at the high school grounds.

Henry Knight first discovered the Gold Hill ledge through an outcropping elbow.

The Native Daughters and Native Sons organizations have prepared the program of celebration for the Gold Hill Marker. Mrs. James Wales and H. Ray George have headed the committees of each organization.

20-30 CLUB HAS GRASS VALLEYAN AS GUEST

James C. Tyrrell, postmaster of Grass Valley since 1902, was a guest of the Auburn Twenty-Thirty Club on Thursday evening, October 22. After dinner and the business of the meeting were disposed of Mr. Tyrrell spoke to the Club regarding early days in Nevada and Placer Counties. He finished his talk with reading Elgert Hubbard's inspirational "A Message to Garcia."

Mr. D. C. Stewart, Nevada County Agent of the Pacific Gas & Electric Company, was also a guest.

George Coughlan, chairman of the evening, introduced the speaker, Mr. Tyrrell.

On Thursday, October 29, the Twenty-Thirty Club will hold a Ladies Night, with dinner at the Auburn Hotel. After the dinner and entertainment the members and guests will adjourn to the Placer County Country Club where dancing will complete the evening.

NEVADA COUNTY MAN IS HELD AS ARSONIST

Jack W. Wright, resident of North San Juan section, was arrested Tuesday by the Deputy State Forester W. F. Sharpe on a warrant charging that he unlawfully set a fire in the vicinity of that town last July. The town narrowly escaped destruction as a result.

The complaint was sworn to by Horace Kennedy. Bain Crawford is also jointly charged with being responsible for the setting of the fire. He has not been apprehended as yet.

BERT BROCKART HAS A PROMISING LOOKING MINE

Bert Brockart, who owns three claims near the Florida House just west of the Old Mountain House near Forest was a Nevada City visitor Tuesday.

He stated that while he was working in his 80 foot tunnel his house caught on fire and all was a total loss. When he came out of the tunnel his home was a pile of ashes. He saved only the clothes on his back. Mr. Brockart is not discouraged, however, and will move into another cabin on other claims he owns not far away.

Mr. Brockhart has struck a good quartz ledge on his property that runs from 4 to 6 feet in width. He run the 80 foot tunnel to strike this ledge and is now drifting on the ledge toward the south. He is pleased with the looks of the ore and feels he has a good property.

ALLEGED BAD CHECK PASSER RETURNED HERE

Sheriff George R. Carter and W. H. Westbrook the complaining merchant, went to Kingman, Ariz., this week and returned with E. J. Reid, also known as Lionel Dickens, and he will stand trial in the local court on the charge of forging and cashing a check in the sum of $65. on a Grass Valley store.

Reid or Dickens is held in jail on a $5,000 bond and will await superior court action. He waived preliminary examination.

NEVADA CITY IS MAKING MANY CHANGES

Within the last few weeks several new places of businehs have opened in our midst which shows the advantage of having a payroll in a town.

The old funeral home on lower Broad Street has been leased to a tinsmith, who will soon open up for business.

Ralph Russell has purchased the house and lot of Henry Berkman at the corner of York and Commercial Streets. It is 16x135 feet, extending back to the city library lot. According to reports he will tear down the back of the building and add rooms for renting, besides build a couple of cabins on the back of the lot. This will add much to that section of town.

The nice new apartment over the tamale parlor on Pine Street is fast nearing completion.

Three new soft drink establishments have opened up in the last few weeks. One is in the place where Leiter's Radio Shop formerly was; one is in a vacant place next to Larsons Barber Shop, and Bob's Place is in the old Forestry Building on Broad Street.

The Kopp cabins on Nimrod street will soon be ready to rent. Many calls have come for these buildings. It is rumored that several more cabins will be added to this group, besides others to be built by other parties.

The Miner's Lunch a new restau-

(Continued on Page Two)

A. A. TREGIDIO PASSES AWAY OF HEART ATTACK

A brief message was received by J. M. Hoff, Tuesday announcing that Don Tregidgo, a former resident of Nevada City had died. He was the son of the late A. A. Tregidio and the earlier years of his life were spent in Nevada City. He attended the local grammar school as a boy.

During recent years he had been employed by a San Francisco firm, which dealt in mining machinery and made periodical trips to Nevada City. It was about a week ago that he called at The Nugget office, on one of his trips. He was a friendly likeable man, and was always welcomed with pleasure on his trips.

Death was due to an attack of indigestion and heart trouble.

OLD COLONY MINES TO SLUICE

A crew of seven men have been busily engaged for some time reopening and preparing for gravel sluicing at the Old Colony Mine situated at the head of Woodruff Creek.

This property is situated in a well known gravel and quartz gold producing district, and the new owners should get results from their work.

NEW VEIN FOUND IN ST. LOUIS MINE

The Nevada County Mines, Inc., have just finished cutting a station on the 120 level of the Constitution Mine. They are taking out a block of ore 200 feet long and 40 feet deep. The vein at this mine is 3 feet wide.

Mr. Hoff, manager, announces that the mill goes on three shifts sometime next week as they have enough tonnage to average 100 to 150 tons daily.

Dick Lyle has just finished unwaternig the Bellefountaine Mine Thursday. Men have started drifting and stoping on the 300 level in this property. It has been 20 years since the mine was worked. Good values in sulphide ore have been found. The vein is about 30 inches wide. Ore assays run about $16 a ton, it is stated.

A new vein was found in the St. Louis Mine which runs east and west This is the first vein found in the Willow Valley Section that runs in that direction. In the St Louis tunnel which is in about 1800 feet from the portal, ore runs for 21 feet along the new vein. This ore averages about $46 a ton. A winze has been started on the vein, and they are sinking. A station is now being cut also. The vein is between 3 and 4 feet wide.

Mr. Ernest Harker, formerly with the bureau of mines, now is in charge of engineering and metallurgy. He has surveyed and found the croppings of this east and west vein on the surface for a distance of 600 feet from the discovery point. This vein will give about 400 feet of backs.

The LeCompton Mine is progressing nicely. A station is cut at the 200 level.

At the LeCompton mine, the principal power plant is being installed, due to the fact that the vertical drop of several hundred feet in the pipe line which has been installed affords ample power. From that point compressed air will be piped to the different properties.

The Company has installed a 600 foot compressor which will give a

(Continued on page two)

GOLDEN CENTER MINE SOON START OPERATIOS

The unwatering of the Golden Center Mine was completed a few days ago by the Cooley Butler interests of Los Angeles. Plans are to start operations on a broad scale at an early date.

About 15 years ago this old mine produced a large amount of execllent ore.

Cooley Butler has control of large gold-mining properties in the Grass Valley district and reports are that he plans early commencement of work on a number of them.

VISIT OLD GHOST TOWN

George W. Starr and Cornelius Lakeman were recent visitors in the old mining camp of Bodie in Mono County. From there they went on to Boulder Dam near Las Vegas. The Bradley intersts are trying to make paying properties of several former producers at Bodie.

CITY CAPITALISTS TAKE OVER SACRED MOUNT MINE

Ten stamps are dropping on good ore at the Sacred Mount mine near Sierra City.

This property has been idle for several months and was recently bonded to San Francisco capitalists by Mrs. Marie Phelan, the owner.

Mrs. Marie Phelan is the wife of the late Richard Phelan, and has a number of rich mine properties in the vicinity of Sierra City and Downieville.

MINING PERSONALS

Thomas H. Park, wife and son of San Francisco are in Nevada City for a few days. Father and son are looking over mining properties.

L. A. Smith, who is operating the River Placers, Ltd., Mine on the Middle Yuba River near the Delhi Mine was a recent visitor in San Francisco.

INDIAN SUMMER

With the long dry spell Nevada City and County have had, they have enjoyed a particularly pretty Indian Summer and fall. The beautiful autumn leaves in all shades on trees and vines were a delight. As a visitor here from the San Joaquin Valley remarked the autumn leaves here were prettier than the flowers in the valley.

The following article clipped from the Pathfinder of October 31st gives an appropriate comment on autumn:

"Flowers that bloom in the fall, flowers that boldly push forth their brilliant reds, yellows, purples and golds on a world growing sober and languid in preparation for winter retirement deserve human appreciation and gratitude. The lilies and tulips and roses of spring come with a budding, growing, unfolding nature when everything is springing up at the call of new warmth and moving forward in a tide of life and beauty. But the fall flowers come when the tide is receding. They are here to comfort and cheer us when the others have trooped away, abandoning us at the first chilly breath. Then break forth the bold bachelor's-buttons, zippy zinnias, glorious chrysanthemums and dahlias and the burnished hosts of salvias, cannas, cosmos and marigolds. They are like fresh springs in the arid deserts; like beds of glowing coals on the bleak pampas —their charm and friendliness—are enhanced by the contrast with their dull and colorless surroundings. Fall flowers come to us like those rare friends when one is in need."

SIXTEEN TO ONE MINE HISTORY IS GIVEN

(Continued From Page One)

"Sink to the end of the rope." The crosscut was started at the 2,100-foot point, and at 200 feet (in the footwall of the winze) it struck the upper tip of the segment of the vein. This is probably the only known place where a hoisting rope solved a fault problem. Continuation of the winze at an angle of 60 degrees intersected the hangnig wall of the vein at the 2,700-foot point. From this point the winze followed under the vein at a 60-degree slope to the 3,000 level.

Characteristic of both winzes is a considerable variation in the angle of slope, and characteristic of the drifts is the variation in the strike of the vein. The vein varies in width from a seam to a maximum of 30 feet. It is a vein to gladden the heart of a miner, for it is of white quartz, ribbon structured in places massive in others. Its curvature, slips and faults, pinches and enlargements make it an enchanting miner's problem. However, when it comes to "values", the miner's problem becomes bewildering. Much of the quartz is too low-grade for profitable extraction. The sweetening in the vein,occuring at irregular intervals and varying in amount—the plums in the pudding—are the lure that drives the raises and their fingers into the nearly barren quartz, and the gold from them keeps the mine on a paying basis.

The Sixteen-to-One is not a pocket mine. Its oreshoots are unlike those in the Grass Valley mines, unlike the South African reefs, unlike the Hollinger veins. The gold is not at all uniformly distributed in the quartz. The quartz can be followed, but the vein enrichments vary in size, in distribution, and in total amount of gold gained therefrom. Often they are close to the hanging wall, in some instances near the footwall, sometimes in the pinched portions, more often in the enlargements. Usually commercial mineralization occurs near a system of slips, and it is more often in the gently dipping areas than in the steeper parts of the vein. Geologists and practical miners have sought some system whereby the enrichments could be more cheaply found than by the driving of a series of raises into the blank vein and fingering these out when negative results are obtained. So far, the most successful postulate appears to be that the enrichments are in the vicinity of the serpentine intrusions that intersect and are faulted by the vein. But even this may be disproved by future working.

Another disconcerting feature is the fact that a working may be within a few inches of an enrichment, and unless the telltale of a sparkle of gold is detected the enrichment will be passed by. Needless to say, the quartz exposed by each round in the drifts and raises is minutely examined. Cut samples and assays are of little value. All the quartz mined and secured from development workings is sent to one of the mills. Some gold is thus obtained—one or two dollars to the ton—except where the quartz is from the vicinity of an enrichment. Drifts are driven wide and high, 6 to 7 feet by 7½ feet or more; raises are 7x12 feet or larger. Surface exposure in such workings is the objective. Drillings are panned, and sometimes afford a clew to an enrichment.

Below the 250 level and above the 800 drain tunnel, north of the Six-

(Continued next week)

GRASS VALLEY BUILDS MANY NEW HOMES

Our neighboring city Grass Valley is also feeling the rise in prosperity from the gold mines and has 28 new homes under construction according to late reports.

About half of these were for owners and the others spoken for for rent before construction began.

NEW VEIN FOUND IN ST. LOUIS MINE

(Continued from page one)

total of air in the various mines of 1350 cubic inches.

The mines are so arranged that each get their shift at this compressed air for an 8 hour period.

Mr. J. M. Hoff states that they have just completed a laboratory and office which is now the best equipped in California. A Kraut cell has been installed so that ore may be tested by amalgamation as well as flotation.

Mr. Hoff secured options and leases on the half dozen or so properties he is operating, once producers, but closed from thirty to fifty years and these he is opening up one by one.

As the mines are located relatively close together, he has adopted the policy of concentrating all reduction and recovery prosesses at one plant, which is the St. Louis.

The former stamp mill has been rebuilt into a combination stamp and ball mill with flotation cells as the principal recovery agent. The management is pleased with the good result being obtained.

The mine is able to truck ore at all seasons of the year due to the several miles of road they built on the property tris summer.

CHRISTIAN SCIENCE PRESENT PROOF

By W. Stuart Booth, C. S. B. of Denver, Colorado.

From a member of the Board of Lectureship of the Mother Church. The First Church of Christ, Scientist, in Boston, Mas.

After explaining that the Christain Science text-book, "Science and Health with Key to the Schiptures" was written by Mrs. Eddy to unlock the hidden treasures of the Bible, Mr Booth pointed out that Christian Science emphasizes and verifies the saying of Christ Jesus that "the kingdom of heaven is at hand."

Hence the consistency of the opening words in the Preface to Science and Health with Key to the Scriptures, "To those leaning on the sustaining infinite, today is big with blesings." Think of it! Today,—not tomorow, or next year, or after you leave this plane of experience,—but today is big with blesings for all who lean on the sustaining infinite God, the everpresent Giver and Governor of all reality." "To those leaning on the sustaining infinite," to those trusting solely in divine Mind for guidance and protection, to those depending on spiritual power and means alone for healing today is big with the blesings of peace and power, of goodness and gratitude, of health, harmony and happiness. But in order to lean on God we must have something more than a blind faith in God; we must hed the admonition in the book of Job: "Acquaint now thyself with Him, and be at peace: thereby good shall come unto thee." (Job 22:21.)

It is certain that the infinite Creator of the infinite, eternal universe must be good ni order to be eternal; evil is destructive in its very nature. This infinitely good Creator of all that is true must be infinite Mind and all-embracing Truth. And, since God is ever giving or expressing all of good impartially and universally, it follows that God is Love. Thus Christian Science reveals God as both the Mother and Father of all reality, the one infinite Mind and Truth, the Source of all true ideas. But, says someone, there is nothing new or different about that concept of God, for the Bible teachings implicitly and explicitly set forth these ideas about God. That is absolutely true, for Mrs Eddy employed the Bible as her sole guide in her study and elucidation of the Science of Christianity. The difference between Christian Science and other religious teachings is to be found ni the acceptance and application of these truths about God in thethe meeting and mastering of the problems of today.

Through Christian Science the practical, present-day importance of the words and works of Christ Jesus is realized. Christ Jesus is realized. Christ Jesus was the Wayshower that we might be way-goers, that we might think as he thought, that we might live and love as he did, and that we might perceive and prove the power and presence of God, good, even as he did when he healed all manner of disease, cast out evils or devils, and overcame the belief in death.

After giving accounts of Christian Science healing of sickness and sin, Mr. Booth concluded by saying, a visitor to the Louvre said, as he was leaving, "I see nothing remarkable about the pictures." An officer at the door replied, "Sir, the pictures are not on trial, but the visitors are." So Christian Science is no longer on trial, for it has been tested and has been proven to be the reinstatement of primitive Christianity; its promise of present release from bondage and of present reward for right endeavor has been abundantly verified. "Behold, now is the accepted time; behold, now is the day of salvation."

STABILIZATION OF THE GOLD INDUSTRY

(Continued From Last Week)

V. The amounts set aside by the employee and the company with interest compounded semi-annually at per 5% until retirement at age of 70, for a typical average employee, would provide an annuity of approximately one-half pay.

VI The administration of the pension plan for each company shall be under the direction of a Board of Administrators, consisting of representatives, one-half appointed by the management and one-half elected by the employee members. The powers and duties of the board for each company will be to formulate general rules relating to eligibility of employees, conditions of retirement, etc. but such rules shall be in consonance with the general plan laid down by the General Board of Administration of the trade association of which the company is a member, and approved by the federal supervisory body.

VII. The amounts collected from the employees and the companies shall be placed with a pension trust organized by the association, the management of which shall be under the direction of the General Board of Administration referred to here-after. In no case shall such funds be left under the control of an individual company.

VIII. The pension trust shall invest all funds and place them to the credit of the individual employees, including the income earned by the trust. If an employee goes from one company to another in the same association, the funds accumulated to his credit shall be continued to his credit with proper record of transfer. If an employee goes to a company in another association, the funds accumulated to his credit shall be transferred to his credit in the pension trust of the association to which he goes. If an employee goes to a company which does not come under these provisions or which is not a member of a trade association; goes into business for himself; or withdraws from an industrial or commercial occupation, the amount of his payments plus the interest at the average rate earned by the funds shall be given to him. If an employee dies before reaching retirement age, his beneficiary will receive the amount of his payments plus interest at the average rate earned by the funds. When an employee reaches retirement age, the entire amount accumulated to his credit, including his own payments and those of the company, plus accumulated interest, will be given to him in the form of an annuity. If an employee goes to a company which does not come under these provisions or which is not a member of a trade association, goes into business for himself; or withdraws from industrial or commercial occupation, he may elect to let the amount to his credit (namely his own payments plus those of the company and the accumulated interest remain with the pension trust for transfer, if he should return to the employ of any company coming within the provisions of this plan. If he does not return to the employ of a company coming under these provisions, he may at any time thereafter withdraw the amount of his own payments plus interest at the average rate earned by the funds up to that time. Company contributions and accumulated interest credited to employees who die or for reasons indicated above, receive or withdraw their own contributions and interst shall be returned to the employer or employers who made the contributions.

IX. The rules governing the payments of pensions on retirement and all other rules governing its continuance shall be made by the trade association ,approved by the federal supervisory body, and observed by the General Board of Administration of the member companies.

(D) Unemployment Insurance. All employees on piece work, hourly work, daily, weekly or monthly work with normal pay or $5,000 a year or less (approximately $96.15 per week) shall be covered by unemployment insurance.

1. All such employees may, after two years of service with a company coming within the provisions of this plan, and shall, after five years of service, be each required to put aside a minimum of 1% of earnings, but not more than $50 per year for an unemployment insurance fund.

II. The company shall be required to put aside an amount equal to that put aside by the employees, as set forth above, namely 1% of the earnings of each employee, but not more than $50 per year for each such employee.

III. If a company regularizes and guarantees employment for at least 50% of the normal wage paid each year to such employees, the company assessment for employees covered by such guarantee need not be made, but the employees will pay in a minimum of 1% of earnings, but not more than $50 per year, into a special fund for their own benefit.

If such an employee leaves the company, dies, or retires on pension, the amount to his credit in the special fund plus interest at the average rate earned by the special fund, shall be given him or to his beneficiaries or added to his pension.

IV. If a company so plans its work that it is able to reduce unemployment, when the amount of such company's credit in the normal unemployment fund is equal to but not less than 5% of the normal annual earnings of the employees covered, the company may cease making payment to the fund. Employees' payments will continue. The company will resume payments when its credit in the normal unemployment fund falls below 5% of normal annual earnings of the employees covered.

V. When the weekly payments made from the fund for unemployment benefits amount to 2% or more of the average weekly earnings of participating employees, the company shall declare an unemployment emergency, and normal payments by the employees and the company shall cease. Thereafter all employees of the company (including the highest officers) receiving 50% or more of their average full-time earnings shall pay 1% of their current earnings to the unemployment fund. A similar amount shall be paid into the fund by the company. The unemployment emergency shall continue until normal conditions are restored, which shall be determined by the Board of Administrators of each company. Thereupon normal payments will be resumed.

VI. The main provisions for the distribution of the funds shall follow along these lines, unless modified by the Board of Administrators as set forth in section D paragraph VII hereof. A certain small percentage of the normal payments of the employees and the company may be considered as available for helping participating employees in need. A larger percentage of such normal payments may be considered as available for loans to participating employees in amounts not exceeding $200 each, with or without interest as may be determined by the Board. Balance of the funds shall be available for unemployment payments Unemployment payments shall begin after the first two weeks of unemployment and shall amount approximately to 50% of the participating employee's average weekly or monthly earnings for full time, but in no case more than $20 per week. Such payments to individual employees shall continue for no longer than ten weeks in any 12 consecutive months unless extended by the board. When a participating employee is working part-time because of lack of work and receiving less than 50% of his average weekly or monthly earnings for full time, he shall be eligible for payments to be made from the fund, amounting to the difference between the amount he is receiving as wages from the company and the maximum he may be entitled to as outlined above.

VII. The custody and investment of funds and administration of the unemployment insurance plan for each company shall be under the direction of a Board of Administrators consisting of representatives, one-half appointed by the management and one-half elected by the employee members. The powers and duties of the board shall be to formulate general rules relating to eligibility of employees, the waiting period before benefits are paid, amounts of benefits and how long they shall continue in any year, whether loans shall be made in time of unemployment or need, whether a portion of the funds shall be placed at the disposal of the board for relief from need arising from causes other than unemployment, etc., but such rules shall be in consonace with the general plan laid down by the General Board of Administration of the trade association of which the company is a member, and approved by the federal supervisory body.

VIII. If an employee leaves the company and goes to work for another company coming within the provisions of this plan, the proportionate amount remaining of his normal contributions, plus interest at the average rate earned by the funds, shall be transferred to such company and to his credit. If he leaves for other reasons, dies, or retires on pension, the proportionate amount remaining of his normal payment, plus interest at the average rate to him, or to his beneficiary, or added to his pension. When such employee's credit is transferred to another company, or paid to the employee or to his beneficiary under this provision, an equal amount shall be paid to the co-operating company.

General Administration

Each trade association will form a General Board of Administration which shall consist of nine members, three to be elected or appointed by the association, three to be elected by the employees of the member companies, and three, representing the public, to be appointed by the federal supervisory body. The members of the General Board, except employee representatives, shall serve without compensation. The employee representatives shall be paid their regular rates of pay for time devoted to Board work, and all members shall be paid traveling expenses, all of which shall be borne by the trade association. The powers and duties of this General Board shall be to interpret the life and disability insurance, pension and unemployment insurance plans adopted by the trade association and approved by the federal supervisory body, supervise the individual company Boards of Administration, form and direct a pension trust for the custody, investment, and dusbursements of the pension funds, and in general supervise and direct all activities connected with life and disability insurance, pension and unemployment insurance plans.

CONCLUSION

The foregoing plan tends to put all domestic corporations of the class described on a parity for domestic business, thereby removing the inequalities of the different laws in the several states, provides for standard forms of financial reports and their periodical issuance for the information of stockholders, places on organized industry the obligation of co-ordinating production and consumption, and a higher degree of stabilization. This will tend to assure more uniform and continuous employment for the worker and to remove fear from his mnid, allowing him to devote himself whole-heartedly to his task. Cost of the product will include these items and will therefore be paid for by the users of the article or service and not in general by members of the community reached by the vicarious method of the imposition of a tax. Then organized industry will be in the position that it should rightly assume of serving the public, with public confidence and with the joint participation of workmen and management in the solution of these vital and far-reaching problems.

ADDENDUM

The following provision is suggested to place domestic corporations of the sort described on a parity with foreign competition: Any company engaged in export business may, upon application to and approved by the federal supervisory body, deduct from its federal income tax the equivalent of X per cent of its export sales, this X per cent deemed to be the equivalent in selling price of the various provisions for the benefit of employees which the company must make under this plan and from which some foreign companies which the domestic companies have to meet in competition are free.

By this method American industry can discharge its obligations to its employees and, by holding its position in the markets of the world, bring additional work to America.

A QUESTION for HUSBANDS and FATHERS

"HAVE I ENOUGH LIFE INSURANCE TO PROTECT MY FAMILY'S FUTURE?"

It is an important question because, for most of us, life insurance provides the best way to leave an estate adequate for the family's needs. Although this Bank does not sell life insurance, it does endorse its value in the building of an estate.

Many farsighted husbands and fathers, owning adequate life insurance, are providing one additional safeguard for their families—Life Insurance Trusts with Bank of America.

They know that only in rare instances do the beneficiaries of life insurance possess investment skill and experience. Capital may be spent as income, or imprudent investments may sweep away the proceeds. Through a Life Insurance Trust with Bank of America, dependable income is assured, with flexibility to meet emergencies.

Unique in its statewide service, this Bank places at your command, wherever you live, the specialized facilities of a metropolitan trust company. Call or write for our interesting new booklet, "The Modern Conception of Life Insurance".

MINING AND TOURISTS IN, AROUND CAMPTONVILLE

CAMPTONVILLE, Oct. 26—The big storm has eliminated all danger from forest fire so the local department of Forest Service has adopted winter schedule by letting off the fire guards, and the local "hello girl", Constable A. H. Behrens. Instead of listening for fire calls and complaints relative to stray cattle, the Consatble will spend the winter at his Oregon Creek home listening to the radio.

The local Forest Service has a very good record for the season; many fires have been put out, and all work has been done with a maximum of haste and efficiency and a minimum of expense, much to the credit of Forest Ranger Frank W. Megers, one of the most popular and best liked rangers in the service.

A warning has been issued by the Yuba County Board of Supervisors to some of the mines in the Alleghany District who have been transporting heavy mining machinery, in regards to Yuba County Ordinance No. 73, which sets 17,000 pounds as the gross weight limit for all wooden or iron brdiges or culverts in the County. It is alleged that some of the mining companies have been hauling loads weighing 34,000 pounds over these roads, almost over the limit of the state law, and some of the culverts have been broken through. Violation of this ordniance is a misdemeanor and future violations will be prosecuted to the full extent of the law.

Roscoe Downs and associate from the south have leased the Lohman Ranch at High Point five miles south of here and will do some development work there this winter. It is claimed that there is very good prospects for the making of a very good mine on this ranch.

Mrs. Acton M. Cleveland and Mrs. Fred J. Joubert returned Wednesday from a visit with relatives at Sacramento.

Julius E. Pauly and M. G. Calvin motored to Grass Valley Thursday on a short business visit.

William O. Grant motored to Sacramento Wednesday.

John Schnellman of High Point was in town Saturday.

John Ramet left Saturday to spend a few days at Columbia Hill.

aKte Hope Livingston motored to Marysville Saturday to attend a meeting of the Yuba County Board of Education.

Mrs. C. W. Turner, Lawrence Turner and Eleanor Turner motored to Oroville on a short visit Saturday.

Mrs. Lester Jaynes and son, Robert, pased thru town Saturday from Downieville enroute to Nevada City to visit relatives.

Erle Pauly motored to Marysville Saturday.

Al Youngblood and party arrived a few days ago from the south and are mining on Willow Creek.

Inspector A. J. Ponta of the State Highway Patorl, is back on the job again after a vacation spent at the bay.

Word was received here a few days ago f the death of Ben T. Williams, a native and former resident of this place. Although he has been ill for several months, his passing was received as a shock by many of his friends.

William was born here 62 years ago and spent the first several years of his life as part of this community. He was a man of sterling character and was well liked by all who knew him. He was employed for many years, and up to the time of his death by the American Bank and Trust Company in their head office at Grant Avenue, O'Farrel and Market Streets in San Francisco, where his many mountain friends were always welcomed and received with the glad hand.

He is survived by a daughter, interment was made in the bay district He made a visit to his old home here a couple of years ago. Mr. William was interested in mining property with several other people in the Garden Valley mining district five miles south of here.

A well dressed, sedate man, riding in a pompous car liscensed in Arizona, strolled into town Saturday, took a look and a picture of the famous Pelton Monument, and then inquired how anyone here knew it was a Pelton Wheel, and how they knew the first Pelton wheel owned by the Grove Sisters is the first wheel!

Well, as a matter of fact, how does one know Columbus discovered America, or that George Washington was the first president of the United States, or that Lindberg was the first to fly across the Atlantic, or how does that man know he is alive! Such preplexing questions!

He further satated that the Grove sisters should give this first wheel, if it is the first, to the University of California!

A TRAPPER'S PRAYER

(Composed by request)

Oh! Give me a cabin, back in the hills
Among the murmuring pines;
A home of my dreams
Where there's plenty of streams
To run my old trap-lines.

Oh! Give mea cabin, back in the hills
Where the air is pure and free;
A cozy little nook
Beside some brook
And, that's all I'll ask of Thee.

Oh! Give me a cabin, back in the hills
In the mountains of our glorious West,
It's a place, which to me,
Shall ne'er cease to be
A perfect haven of rest

Oh! Give me a cabin, back in the hills
In Nature's garden so fair;
To tred the paths no others have trod
To view the work, of Nature, and God
Is a humble trapper's prayer.

By J. M. Swazey.

ARSON CONTROLLED BY STATE OF ILLINOIS

Arson, as Fire Marshal S. L. Legreid of Illinois, recently pointed out, is a crime whose successful prosecution requires the support of a strong and united public sentiment. It is one of the most despicable of all crimes— one which affects the security and pocket-book of every citizen.

Illinois has made a good record in combatting it through the creation of local arson squads. These are headed by the fire chiefs, in association with the heads of the police and public spirited property owners. The duties of each squad are: Prompt and thorough investigation of every fire; securing all possible evidence in suspicious fires; cooperating with the State fire marshal in cases warranting further investigation; building up a state of public opinoin which will not tolerate arson.

During the last fiscal year 66 convictions for arson were secured in Illinois—a record for a twelve month's period. Two notorious arson rings which had been profitably operating for several years, were broken up. Depredations of a gang of boys who had terrorized farms by burning barns, homes, sheds and stacks of hay, were stopped. It is said that the authorities were greatly aided by Illinois' model arson law which provides sliding penalties to fit the individual case, whereas the old law requires the same penalty in every instance.

Other states would do well to follow this example. The crime of arson must be stamped out.

The people ought to be convinced that everyone pays taxes. Everyone who pays rent pays the tax on the real estate that he occupies. On everything purchased in a store taxation is somehow included. The politicians fail to explain this, for it does not suit their book.—From the Iron Age.

TELEPHONE HELPS AMOS 'N ANDY HAVE VACATION

Special Circuits Carry Program From Lake in Wisconsin to Broadcasting Studio

Among radio broadcasters, Amos and Andy are habitual users of the telephone in putting on their "act." When Andy is not calling Madame Queen, the Kingfish is calling Amos, asking for contributions or donations for the Mystic Knights of the Sea, or is having a conversation with Andy regarding "a new deal." An executive like President Brown needs a telephone to expedite the many details in connection with the Fresh Air Taxicab Company, as well as with the lunch room.

The two comedians spent their summer vacation in adjoining bungalows at Lake Geneva, in southern Wisconsin. So that the millions of radio fans might be able to enjoy their broadcasts, telephone forces installed two direct radio program supply circuits connecting Lake Geneva with radio station WMAQ at Chicago, the key station in the network which features Amos and Andy. The regular program circuit was accommodated on the Chicago-Milwaukee toll line, but an alternate circuit was also provided from Lake Geneva by way of Crystal Lake, Ill., and on to Chicago.

HIGHWAY PATROL REVEAL CAUSE OF MANY DEATHS

Sacramento, Oct. 30,—Records of the California Highway Patrol revealed that 1,491 motor accidents involving death or injury were caused by drunken drivers or drunken pedestrians during the first seven months of this year.

Of these accidents 133 resulted in deaths. The other 1,348 ranged from serious accidents that left their victims crippled for life to those of a minor nature.

Of the drivers involved 1,293 were listed as having been intoxicated. There were 188 drunken pedestrians involved.

Physical defects either in drivers or pedestrians resulted in eight deaths and injuries to sixty-four individuals during the period.

The observation has been made by patrol officials that in traffic accidents involving a drunken pedestrian the pedestrian, himself is usually the victim. Where intoxicated drivers are directing the motor vehicle an innocent person is frequently killed while the drunken driver may escape injury entirely. This situation calls for judges to invoke the maximum penalty provisions in the law against the drunken driver. The number of drunken drivers is steadily increasing each month according to the state records.

Allowance of $2.50 *for an old heater on this new Electric Heater!*

YOU should keep an electric heater handy for the sudden changes to cold and rain. The sunny, cheerful glow banishes chills. Use an electric heater for dressing, bathing or when the children come home with cold, wet feet.

There are two types of portable electric heaters: Those that heat and circulate the air and those that give a beam of heat where you want it. Your dealer has both types.

Our low electric rate makes portable electric heating economical.

Trade in your old heater

We will allow you $2.50 for for your old—oil, coal, wood or electric—portable heater when you turn it in on a new Wesix Cent-a-Watt. That means you pay but $10 on terms, for a $12.50 heater.

More than 54,000 in use

Even if your old heater is good for nothing we want to replace it with the popular, new Cent-a-Watt. To obtain your heater, fill out and mail the coupon below or telephone us.

The Cent-a-Watt is made to heat the air in small rooms. It is finished in aluminum. To obtain heat you simply plug it into any baseboard outlet. The heater is designed upon the same principle as its successful big brothers which heat entire schools, apartment houses, churches, and homes.

Now while this offer is still open, pencil your name and address on the coupon below and mail it to our local office. Orders may come and go by the hundreds, but you will be sure of your heater immediately.

Remember, this is not a sale. But it is an offer that people snap up quickly. Each of the first 3,860 P. G. and E. customers who turn in an old heater will get a new heater for $10. The $10 is payable in easy, never-missed payments of $1 a month. Just let us send you a heater. Price of Cent-a-Watt where old heater is not turned in, is $12.50.

FILL OUT AND MAIL THIS COUPON

Pacific Gas and Electric Company.
(Mail to local office.)

Gentlemen: Please send me a new Wesix Cent-a-Watt electric heater. I have an old portable heater which you are to accept for the first payment of $2.50. You may then bill me $1 a month for 10 months.

NUGGET READER COMMENT ON PLATINUM ARTICLE

(Continued From Page One)

placer mining in California was on the "boom," platnium was cheaper than gold. My recollection is that in the form of manufactured apparatus used in chemical laboratiries it was about $15 per ounce. Therefore it was to the best interest of the hydraulic miners not to let it be known there was any platinum in the bullion they sold to the mint, even if they had a suspicion there was. The platinum present in the bullion helped them in two ways—its higher specific gravity and its lower value.

Mr. Parsons stated in the Trinity Journal (as quoted by your item) that though platinum does not amalgamate with quicksilver if it is present is the ore washed "it will invariably be picked up in cohesion with the gold." I think a more exact way to state this would be that it would be picked up by adhesion to the gold amalgam, without being acsible.tually amalgamated. This is a possible explanation of what has puzzled me for several years. In the state mineralogist's Report for 1884 (?) there is a table of the finess of the bulletin from the leading hydraulic and drift mines i nthe state. In the case of 5 of the larger producers this varied as much as forty ponits or more. For instance Bald Mountain (drift) from 915 to 956, Columbia Hill from 922 to 961. For many years I supposed that the higher finess wa scoincident with a higher proportion of coarser gold. I know by experience of 40 years at a quartz property that higher grade ore, which meant coarser gold always raised slightly the finess of the bullion for that run. But I was told, by people who ought to know, that the bullion from hydraulic operations was of lower fineness when they were washing a bench known to gold. Now Mr. Parson's statement of statement of the cohesion of platinum to the gold amalgam possibly explains this. When they were washing a bench known to have a higher ratio of fine (in state of finer division) gold there was consequently to hold the platinum, a higher ratio of silver as the platnum carries no silver— I am only suggesting this as a possible expnalation of the wide variation of fineness of bullion from gravel operations.

FRENCH CORRAL

FRENCH CORRAL, Oct. 27—Well, all are happy over the general downpour of last Thursday. It was sadly needed, and had been withheld so long, that a great hardship was worked on many. A few days of sunshine will restore to the brown earth. its beautiful verdure, and gladden the heart of hungry animals dependent upon it.

Again this section was treated to a copious downpour Sunday evening when rain and hail fell in such quantity as to overflow ditches and pools and soon enveloped the earth in asheet of water. This did not last half an hour and none were sorry when it ceased, as we did not enjoy a storm in such severity.

Cattlemen are moving their stock down the line and several droves have passed during the week.

Mr. and Mrs. W. E. Moulton and daughter, Frances, made a trip to Sacramento Wednesday, to which place the latter returned after spending a three weeks vacation with her parents in French Corral. Mrs. J. W. Culver accompanied the party as far as Abuurn to visit with her son, Edward Wilcoxson, until the return trip.

Miss Millie Clerkin was down from Pike City for a short visit.

Mrs. A. Browning and son, Clyde, and Mrs. K. Sullivan had businesss in Nevada City Saturday.

Mr. and Mrs. R. McNamara of Tyler visited relatives in French Corral Saturday.

J. H. Haslett and son, Lloyd, had business in Nevada City Saturday.

Miss Martha O'Connor and sister, Mrs. Margaret Madden, and Beverley, Francis and Vernon Pini of Pleasant Valley were visitors at the O'Connor home in Birchville Saturday and Sunday.

Owing to the stormy weather no service was held in the Catholic church in Birchville Sunday.

M. O'Connor made a trip to Pleasant Valley Saturdak and Sunday.

J. Sheaves who has been working on the river for the past summer months, returned to French Corral Monday.

W. P. Clerkin and Chas. Buhl were visitors from near Pike City Monday. Clyde Browning accompanied them on their return trip.

We are sorry to learn that Mr. A. Browning lost his truck in the fire that took place in the Peters-Wasley garage Saturday night.

General sorrow is felt on the San Juan Ridge over the death of Fr. P. Scott, who passed away at San Francisco last week. In the past two years he has spent much time at Columbia Hill, where he was beloved by all who knew him. Fr. Scott suffered from ailments contracted during the World War and his health seemed to improve in this county where his many friends hoped for a complete return to health to him. May his soul rest in peace.

—0—

MANY MINES ARE GETTING READY START OPERATE

R. C. Bauermeister, San Francisco mining man, and associates have acquired by purchase from Clarence O. Nelson of Columbia, the Sonnet mine and from the State the adjoining Riverside mine, located on Grant Ridge, about ten miles north of that town, and are making preparations to resume their development. The Sonnet mine has a 125-foot incline shaft which has exposed from three to four feet of ore of good grade, it is stated. More than 15 years ago an 1,800-foot tunnel was extended on the Riverside property. From this tunnel, a drift will be advanced, it is asserted, to a point beneath the Sonnet workings and connections made forthwith by raising. It is estimated that such work will give a vertical depth of more than 800 feet in the Sonnet property.

Electric power has been installed at the Jumper mine, two miles southeast of Jamestown, which, with the adjoining Mazeppa property, was recently acquired under lease and bond by Guy T. Smoot of Los Angeles and associates from J. W. Schiffman and Con O'Shea of Jamestown. A crew of miners have been put to work cleaning out and reconditioning the Golden Rule working of the property to which operations for the immediate future will be confined, it is stated.

Under the supervision of W. B. Andrews, former Arizona mining man, development work has been resumed at the Republican mine at Jacksonville, recently purchased from the State by H. C. Myers, F. A. Virtue and B. B. Bostic of Los Angeles. Preparatory to the launching of an extensive program underground work, a 600-foot incline shaft is being unwatered and retimbered. The property is equipped with a ten-drill air compressor and other machinery.

Henry Ghezzi of San Antonio, and associates have started the extension of a drift tunnel on a promising looking vein on the McNamee property, two miles west of Columbia, under the supervision of Jack Adams. A complete mechanical equipment is being installed to expedite operations.

RANDOLF, WILLIAM FIPPIN, WILLIAM H. FIPPEN, SIMON HENRY DIKEMAN; GEORGE E. WALLING, as administrator with the Will Annexed of the Estate of L. A. WALLING, Deceased; MARY SILVA, as administratrix of the Estate of JOSEPH SILVA, Deceased; also, all other persons unknown claiming any right, title, estate, lien or interest in the real property described in the complaint adverse to plaintiffs' ownership, or any cloud upon plaintiffs' title thereto,

Defendants.

Action to determine adverse claims to and clouds upon title to real property, brought in the Superior Court of the State of California in and for the County of Nevada, and the complaint filed in the office of the Clerk of said County of Nevada.

NILON HENNESSY & KELLY, Attorneys for Plaintiffs, Grass Valley, California.

THE PEOPLE OF THE STATE OF CALIFORNIA SEND GREETINGS TO:

MANUEL S. CARDOZA, ANDRE SILVEIRA, ANDREW SILVA, JOHN S. NUNES, MATHEW SILVA, MATHEW SILVEIRA, JOSEPH PAREIRA, JOSEPH LUIS, JOSEPH LEWIS, JOSEPH SILVEIRA, JOSEPH SILVIERA, JOSEPH SILVIERA ALMEIDA, MANUEL NUNES LOPES, ANTONIO SILVIERA ALMEIDA, ANTONE SILVIERA, ANTONE SILVEIRA, JOSEPH LOPES, JOHN FRANCISCO, JOHN FRANK, JOHN ANTONE FRANK, JOHN FRANK ANTONE, MANUEL EDWARD FRANK, MANUEL E. FRANK, JOSEPH ANTONE FRANK; MARION CHRISTINE PLETSCHER, MARION CHRISTINE FRANK, H. Q. ROBERTS, MRS. MARY RANDOLPH, MARY E. RANDOLPH, MRS. W. C. RANDOLPH, MRS. M. C. RANDOLF, WILLIAM FIPPIN, WILLIAM H. FIPPEN, SIMON HENRY DIKEMAN; GEORGE E. WALLING, as administrator with the Will annexed of the Estate of L. A. WALLING, Deceased; MARY SILVA, as administratrix of the Estate of JOSEPH SILVA, Deceased; also all other persons unknown claiming any right, title, estate, lien or interest in the real property described in the complaint, adverse to Plaintiffs' ownership, or any cloud upon plaintiffs' title thereto,

DEFENDANTS.

YOU ARE HEREBY directed to appear, and answer to the complaint in an action entitled as above, brought against you in the Superior Court of the State of California in and for the County of Nevada, within ten days after the service on you of this summons—if served within this county,—or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said plaintiffs will take judgment for any money or damages demanded in the complaint as arising upon contract, or they will apply to the court for any other relief demanded in the complaint.

The following is a statement of the object of the action:

The object of the action is to determine all and every claim, estate, right, title, lien or interest in the property herein described; that the plaintiffs are now, and have been, by themselves and their predecessors in interest, the owners of and in the actual, exclusive and adverse possession of the property hereinafter described, continuously for the period of more than twenty years immediately preceding the filing of the complaint in this action, claiming to own the same in fee against the whole world, and that plaintiffs have, by themselves and by their predecessors in interest, paid all taxes of every kind and nature whatever, levied or assessed against said real property during the period of five years continuously immediately preceding the filing of complaint aforesaid; that the claims or claim of said defendants is without right and that they have not nor has any or either of them any right, title, estate, lien or interest in said real property, or any part or portion thereof.

The land and property affected by this action is:

All of those certain lots, pieces or parcels of land situate within the village of Rough & Ready (also known as the Town of Rough & Ready) in Section 24, in Township 16 North, of Range 7 East, Mount Diablo Base and Meridian, bounded and particularly described as follows, true bearings, magnetic Variation 17° 30′ East, to wit:

FIRST: Commencing at a point on the North side of Main Street in said Village of Rough & Ready, (being also the County Road leading from Marysville to Grass Valley) from which the quarter section corner on the line between Sections Twenty-Four (24) and Twenty-Five (25) in Township 16 North, of Range 7 East, Mount Diablo Base and Meridian, bears South 13° 16′ West at the distance of 1350 feet; thence North 55° 25′ West 14 7-10 feet; thence North 30° 13′ West 123 5-10 feet; thence North 59° 58′ East 199 38-100 feet; thence South 62° 39′ East 24 52-100 feet; thence South 26° 42′ East 121 67-100 feet; thence South 60° 09′ West 182 32-100 feet; thence South 75° 54′ West 17 16-100 feet to the place of beginning.

SECOND: Beginning at a point on the quarter section line running North and South through the center of Section Twenty Four (24) in Township 16 North, of Range 7 East, Mount Diablo Base and Meridian, from which the quarter section corner between Sections 24 and 25, said Township and range, bears South 1° 38′ East at the distance of 674 feet; thence, along said quarter section line, North 1° 38′ West 206 1-10 feet to a point on the Southerly line of the County Road leading from Marysville to Grass Valley, (said road being also known as Main Street in the Village of Rough & Ready); thence along the southerly line of said County Road, North 53° 40′ East 54 19-100 feet; thence, along the Southerly line of said County Road, North 34° 40′ East 311 87-100 feet; thence, along the southerly line of said County Road, North 50° 51′ East 183 2-10 feet; thence, along the Southerly line of said County Road, North 75° 27′ East 102 4-100 feet; thence, along the Southerly line of said County Road, North 67° 35′ East, 116 4-10 feet; thence, along fence line, South 20° 05′ East 125 23-100 feet; thence, along fence line, South 83° 54′ East 32 78-100 feet; thence, along fence line, South 24° 22′ East 94 77-100 feet; thence, along fence line, South 65° 42′ East 31 12-100 feet; thence, along fence line, North 74° 13′ East 54 41-100 feet; thence, along fence line, South 22° 24′ East 140 85-100 feet; thence, along fence line, South 26° East 173 72-100 feet; thence, along fence line, South 0° 25′ East 13 82-100 feet; thence, along fence line, South 13° 07′ West 38 74-100 feet; thence, along fence line, South 19° 01′ West 159 4-10 feet; thence along fence line, South 14° 13′ West 105 31-100 feet; thence, along fence line, South 21° 15′ West 64 68-100 feet to corner of fence on the Southerly bank of the "Portugese Ditch"; thence Northwesterly following the Southerly bank of said Portugese Ditch to a point from which the last mentioned corner bears South 62° 26′ East at the distance of 323 29-100 feet; thence, along fence line, South 83° 50′ West 223 75-100 feet to fence corner; thence, along fence line, North 16° 21′ East 56 91-100 feet; thence South 89° 00′ West along the North line of the South West quarter of the South West quarter of the South East quarter of said Section 24, 285 47-100 feet to the place of beginning.

GIVEN under my hand and the seal of the Superior Court of the State of California in and for the County of Nevada, this 16th day of October, A. D. 1931.

R. N. McCORMACK, Clerk,
By A. C. Tucker, Deputy Clerk.

NEVADA CITY THEATRE

HOSPITALITY FEATURES TRUCKEE MEETING

Exceptional hospitality was accorded delegates of the twelve Women's Federated Clubs that make up the tri-county unit, at a convention held at Truckee Wednesday, presided over by Mrs. John T. Chalstran. It was the best attended convention ever held by this group, delegates being present, numbering from one to eight, from each club. Mrs. Frank Brock, northern district president, and Mrs. Florence Kjorlie state chairman of adult education, were speakers. The meeting was held in the Methodist church.

On Tuesday evening a reception was held at the home of Mrs. E. W. Gutheridge, where most cordial greetings were extended.

Pleasing program features were selections from the Wyetha Club choral, and a presentation of "The Legend of the Willow Plate" by the dramatic section of the same club directed by Mrs. Elizabeth Wilkie.

Tributes of respect during the session were paid to the memories of the late Thomas Edison, Mrs. W. L. Fitzgerald of Stockton, Mrs. George McCoy of Sacramento and C. N. McGlashn of Truckee.

The following resolution presented by the Wyetha Club was adopted:

"Whereas, The state park commission has recommended that an addition be made to the Donner State Memorial Park, to include 1000 acres, on the east end of Donner Lake; that owing to the historic interest of this scenic spot to the romantic history of California; be it

"Resolved, That the Tri-County Federation lend its hearty approval to the plan for the purchasing of the necessary land for this park."

A nucleus fund was started for this.

Delegates were present from the following clubs: Applegate, Mt. Pleasant, Loomis, Rocklin, Sheridan, Lincoln, Truckee, Nevada City, Placerville, Study Club of Cool, Roseville Improvement Club and Roseville W. C. T. U.

MINING FUTURE BRIGHTER THAN EVER IN 20 YEARS

A week's visit to Los Angeles, spent largely in conferring with brokers and others indentified with the financial circles of that city, convinces the writer, Ray D. Harris, more firmly than ever that gold mining is entering a new cycle and that the future of that industry in California, in general, holds greater promise at present that it has at any time in the last 20 years. On every hand, gold mining is the chief topic of financial conversation. This is attributable to a multiplicity of causes, chiefly, however, to the seemingly insatiable increasing demand for the percious yellow metal, the practical collapse of the oil market and the enormous losses sustained by investors and speculators in banking, industrial and all other issues in the last two years.

It is evident that the public is, in a large measure, "out of the market" only until such time as some issue or issues shall by market performance or appreciation establish itself or themselves sufficiently to command sustained attention. Many brokers, at least of Southern California with whom the writer came into contact, apparently believe that the gold mining industry will supply such a leader or leaders, especially since the other industries have failed signally in the last two years to develop a stock or stocks of enduring leadership. Then, too, history has shown that renewed public interest in gold mining has in the past marked or followed periods of general business depression such as has prevailed throughout practically the whole world the last year or two.

Due to the wide publicity they have received in recent months, new interest has been aroused in the mines and prospects of the gold producing counties of the State and any information obtainable in reference thereto is eagerly sought by Los Angeles mining men.

This is not the least surprising when thought is given to the fact that fully 75 per cent of the new mining operations inaugurated in the last year in the Tuolumne and Calaveras sections are being financed or sponsored by men of Los Angeles. Their work is being closely watched and is having the effect of attracting others to like efforts. Manifestly, gold mining is again on the ascendency in the public mind.

WHOLE FAMILIES NOW WORKING GOLD DIGGINGS

PORTERVILLE, Oct. 24—Unemployment in many lines of work and poor prices for others, such as cotton picking, which in this district pays only 50 cents per hundred pounds, is responsible for a migration of many into the mountain districts of southeastern Tulare and Kern counties, where they are endeavoring to eke out a living in areas known once to have been gold producing districts.

Porterville men visiting the White river district about 40 miles southeast of here, known as Tail-holt in the gold rush days, and Kern county mountain districts reports whole families in some cases busy at the "working," some using very crude equipment.

Earnings are said to run from 50c to $5 or better some days.

Asemblyman Jerry Seawell of Roseville was a Nevada City visitor Monday and a caller at The Nugget office.

SAN ANDREAS MINES ARE MAKING GOOD PROGRESS

San Andreas, Oct. 30—The Riverside Mines and Metals Company, Ltd., of Boston, Mass., controlled by C. W. Mitchell, a mining engineer of that city, and eastern associates, are making plans indicating that it should soon become an important factor in future lode mining operations in Calaveras County. In association with Todd Elliott of Angels Camp, the company has recently acquired, under lease and bond, three gold properties, namely, the Hercules mine, on Indian Creek, five miles north of Murphys; Lucky Jim mine on Murray Creek seven miles east of San Andreas and Glencoe mine six miles east of Mokelumne Hill Development all three properties it is asserted is soon to be resumed under the supervision of Mr. Elliott.

The management of the Black Wonder mine eight miles southeast of West Point, recently taken over, under lease and bond, and being operated by Charles G Patrick and Los Angeles associates, has made a test shipment of 40 tons of ore to the Selby smelter on San Francisco Bay. The ore was extracted in starting stoping operations above the north drift on the 120-foot level of the 225-foot incline shaft on the property. The vein being developed shows in the shaft, drift and new stope a width varying from two to four feet and in each working yields shipping grade values, it is stated. A force of 16 men divided into three shifts is being employed at the property.

With Fred Zurcher as superintendent, Thomas Johnson, Los Angeles oil man, and associates have put a crew of miners to work driving a bedrock tunnel on a tract of 310 acres of placer gravel land, three miles east of Vallecita, to explore the Fairview ancient river channel. Thus far the adit has been extended about 150 feet. It is estimated that about 300 feet of additional tunneling will be required to reach the objective point.

Personal

Wm. Meservey has left the Nevada City Sanitarium to convalesce at the home of his grandfather, Wm. E. Meservey. He was operated on several days ago by Dr. R. E. Werner for appendicitis.

Postmaster and Mrs. P. G. Scadden are home from a vacation spent at Richardson Springs and with their daughter, Mrs. W. H. More and famly at Pittsburg.

Judge and Mrs. F. T. Nilon had as week end visitors their niece, Mrs. Ralph S. Hoffman and family. They left Monday for Marysville to visit Mrs. J. S. Fuller, another aunt.

CHIROPRACTOR AND FOOD SCIENTIST LOCATE HERE

Dr. B. G. Cronwell, chiropractor and food scientist, has opened an office in Nevada City for the practice of his profession and for the present is located at the corner of Mill and Factory streets.

Dr. Cornwell uses nothing but his hands in his treatments. He is a lecturer and exponent on the use of raw foods and the natural methods of living. He is of a pleasing personality and will be glad to make examinations without charge, and promises his ability to tell what he can do for his patients.

After eight years of steady practice in San Francisco a great desire for the country especially in the mountains is the reason for Dr. Cronwell locating in Nevada City.

Dr. Cronwell is a member of the board of directors of the California Chiropractic association and has been very active in Chiropractic advancement in this State.

It is Dr. Cronwell's ambition to start a health school in Nevada City as soon as a suitable room or hall may be selected. Two hours two evenings a week, a free will offering can be made to cover the over head expenses. He has with him a large black board for shematic drawings. charts and several colored slides and the machine for showing them.

NOTICE

The person, who took the two tents and iron roofs, from the Grizzley Ridge Mine, is known to meand if returned to my place within 10 days, nothing will be done, if not, I must have him arrested.

T. H. Scadden,
Caretaker of Grizzly Ridge Mine.

MANAGER J. C. PENNEY STORE GIVEN SURPRISE

Earl Covey, manager of the J. C. Penney Store of Grass Valley, was given a surprise birthday dinner and party at his home last Sunday evening. Friends and members of the store force gathered to wish him many happy returns of the day, and enjoyed the happy birthday dinner and party.

Several nice presents were received from relatives, while the store force presented him with a gold ring emblematic of the I. O. O. F. order of which he is a member.

At the conclusion of the dinner games were enjoyed.

Those present were, Mrs. Bessie Fuller, Miss Frances Seymour, D. D. Manross, Mrs. Chas. Reed, Wm. Bartle, Miss Edrie Rowe, Gordon Bennett and Mr. and Mrs. Earl Covey.

Judge Oscar Winburn of Grass Valley was a Nevada City visitor Wednesday, and a caller at The Nugget office.

WILLIAM WOODS WINS ACQUITTAL IN ACCIDENT

Wm. Woods, who stood trial in justice court Tuesday in Grass Valley for reckless driving was acquitted by Judge Oscar Winburn.

Woods stripped a bridge on the Tahoe-Ukiah highway clear of railings a few nights ago when his car cavorted from one side of the bridge to the other and finally landed in the creek.

Judge Winburn stated that the evidence tended to show that the trouble was of mechanical origin and not due to bad driving.
